# CLIMBING WALL SAFETY INSPECTIONS

The safety of your climbing wall is fundamental and at Advanced Climbing Solutions we offer a comprehensive climbing wall inspection service to ensure that your wall complies to the European standards EN12572:2017.

---

Our inspectors are fully trained and have many years of practical hands on experience inspecting a wide range of climbing structures. The importance of having a safe and compliant climbing wall cannot be underestimated and we recommend that inspections are undertaken annually. On completion of our inspections, we issue a detailed report to fully outline our assessment of your climbing wall and highlight any areas of concern and recommendations.

# CLIMBING WALL MAINTENANCE, REPAIRS & TECHINICAL ADVICE

From installation to annual inspections and everything in between, our teams can provide the expertise required when it comes to repair and maintenance work on your climbing wall. We can even offer services that include revamping old walls, painting, texturing, retexturing, or simply adding artwork or new designs to freshen up your climbing wall.

## ANCHOR PLACEMENT, TESTING & EN FONFORMITY

Advanced Climbing Solutions can offer additional anchor installations, testing and EN conformity in line with current standards on any artificial climbing structure indoors or out, including adding additional ground belay anchor points. All our work is carried out to the relevant standards **EN12572-1,2-2017, EN15567, & EN795.**

# PPE INSPECTIONS

PPE (Personal Protective Equipment) is a vital part of owning and running any climbing wall so having adequate systems and procedures in place to monitor PPE is critical for the safety of the users and the wall itself and to ensure you are adhering to the relevant int regulations.

Advanced Climbing Solutions technicians are qualified and competent to inspect PPE. We can also work with you to implement internal systems for maintaining your climbing facility's PPE records and offer training on conducting your own PPE inspections, maintaining inspection records and advise on what to look for on daily pre-use checks of PPE.

From inspecting your existing kit to supplying new, we can help ensure full compliance in this area.

# SUPPLY AND INSTALLATION OF SAFETY MATTRESS

From rubber crumb to gym matting, to bespoke modular boulder wall matting, we've got you covered. Whether you are looking for one mat or renewing matting for a full climbing centre, we can work with you to determine the most suitable safety flooring for your facility and ensure minimal disruption to your climbing facility throughout the process from measuring up through to installation.

## EQUIPMENT & HARDWARE SALES

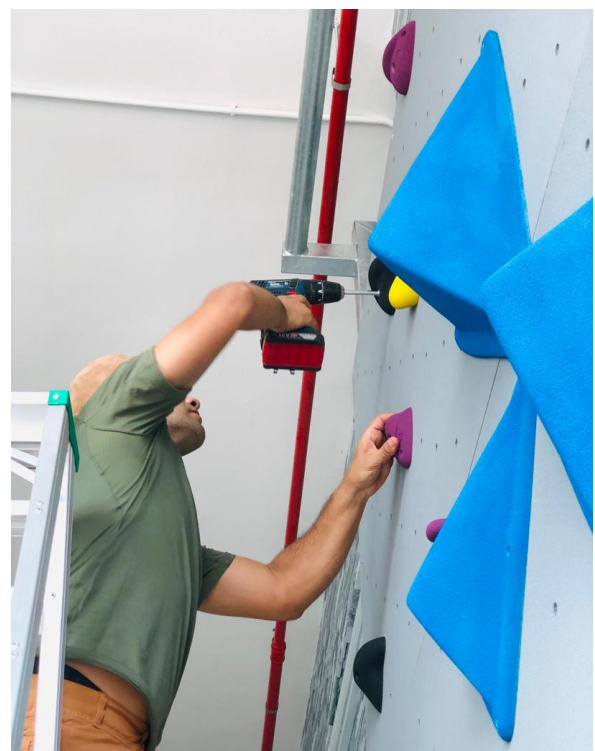

We understand that the safety of your climbing wall and the safety of the users of your wall is paramount, which is why the quality of the hardware and equipment we supply customers, and we use ourselves, can be nothing but the best. At Advanced Climbing Solutions we only use and supply products, equipment and hardware from internationally recognised manufacturers and brands.

# ROUTE SETTING

What keeps the users of your climbing wall coming back for more? Interesting climbing routes that challenge the user are vitally important for the success of any climbing facility. A variety of routes, graded appropriately for the user base, will see climbers returning time and time again. Our route setters will work with you to fully understand the user base of your wall before undertaking any work, to ensure you are left with interesting and challenging routes suitable for your user base.

Whether you're a small home wall, school, youth club, MOD, leisure centre or large commercial climbing centre we can offer a route setting service tailored to your specific requirements.

# STAFF TRAINING

With any climbing facility, it is vital that the staff involved are fully trained and competent in the roles they are given. We can offer climbing wall instructor training sessions and much more. Our training is conducted by Mahdi Parsafarid, a highly experienced and leading course provider for the Sport Climbing Training. Training can include the certification by SOUTHEAST ASIA CLIMBING FEDERATION noted below, as well as bespoke training sessions which can be tailored to suit your specific needs.

- SEACF level 1 - Climbing Safety
- SEACF level 2 - Lead Belaying
- SEACF level 3 - Outdoor Multi pitch / Big wall climbing
- SEACF - Instructor Certification
- SEACF - Route Setting Certification
